

Wait

Emii

Thinking about last night
Can't remember the last time I cried that much Holding this pillow tight
Sitting here thinking what have I done
I hate to say you were my best mistake
It hurts to see you walk away
I can't ask you to stay
My pride won't let me do it But you captured me
And I could never show it 'cause I'm far too young
To say that you're the one But are you now Are you now
I wanna know
For our love
Will you Wait
I believe we could have forever We can take our time together I'm really not ready for it So will you Wait
For our love
Will you Wait
I believe we could have forever We can take our time together I'm really not ready for it So will you Wait
Holding your hand so tight
I can almost feel it when you're not here Thinking I hear your voice
When I look around I find you're not there I hate to say you were my best mistake
I can't believe you walked away
I can't ask you to stay
My pride won't let me do it But you captured me
And I could never show it 'cause I'm far too young
To say that you're the one But are you now Are you now
I wanna know
For our love
Will you Wait
I believe we could have forever We can take our time together I'm really not ready for it
So will you Wait
For our love
Will you Wait
I believe we could have forever We can take our time together I'm really not ready for it So will you Wait
Tell me that you're waiting
Tell me that you'll stay
Tell me that you'll hold on
To the memories we made 'cause someday when I'm ready For the trouble we could make We could steal
forever
So will you wait
For our love

Will you Wait I believe we could have forever We can take our time together I'm really not ready for it

So will you Wait

For our love

Will you Wait

I believe we could have forever We can take our time together I'm really not ready for it

So will you Wait
