

# Silver Tongue

## A Telemetry

push a way towards you  
something here just not right  
much to friendly to believe

asking many questions  
who are you to know  
wants to for go the shield

bust the blatant hint  
only acting  
cuss the wicked word  
turning things over

he's a silver tongue  
watch the way he uses  
manipulation cue

he's a silver tongue  
slip the words right to you  
calculation rings true

a slicker way to delve in  
the challenge waits insight  
can scam the best in his sleep

relentless to the taken  
humble is to crumble  
the only omega that's left

run the primal plan  
needs no checking  
spun the sticky web  
to catch those napping

he's a silver tongue  
watch the way he uses  
manipulation cue

he's a silver tongue  
slip the words right to you

calculation rings true

bulls eye a strike  
right in the middle  
slick-stir never frazzled

wild game his specialty  
but know-one has exception  
one rule one guide is reason to hide

he's a silver tongue  
watch the way he uses  
manipulation cue

he's a silver tongue  
slip the words right to you  
calculation rings true
