ZAYN

I'm sipping pink
Lucozade
We're blazing on that new found haze
I'm seeing in the blacks and grays
I'm hoping that the basket sways

Left to right, sit and talk shit all night
Does that make it right for smoke
Maybe, or am I just seeing shit?
Seeing the pain inside in this house of fear

You don't even wanna know about the things I hear
Quick fix, headlights shine bright, you're the fuckin' deer
I'm just wishing it's ambition that got you
Your position
You'll be fishing for far too long
You're the bad guy in this movie
And I ain't wrong, I don't breathe the pollution
And the only solution is making shit confusing
And it ain't about who's winning or losing

It's bout the path that you're choosing
Time heals pain and promotes self-soothing
When the scars are gone you can't see bruising
Wanted three things: watches, chains and gold rings
I'm getting caught up in the feelings that they bring
A lack of sanity, losing touch with reality
Smoking too much, it's starting to fog up my clarity
Traveling in the day but you're still looking far to me

Bulls eye you the dot to me
Emotions splattered, same pattern
Can't even begin to spot 'em
I'm sad about shit that never happened
No lies in my eyes, nothing but truth will leave my mouth
I'm tryna fucking scream but the words won't come out
I'm, tryna fuckin' scream but the words won't come out

She's older, I told her
We ain't meant to be

It takes two not three, but I'm here any way
I hope he's leaving soon
Sudden not to see the elephant in this room
Disguised as your perfume
But the smell of it consumes, it takes all my mind
You can search the world but you will never find
I see everything you've done to me
Be there, you run to me
I don't need to pace, I don't need the stamina
If this shit was it, girl, I probably woulda ran from ya
Kept runnin'
Outwit, cause you cunnin'
That outfit cause you stunnin'
Begging cause I'm losing mage
Got me feeling some type of way I can't explain
The fuck is going on?
I think I got it wrong
When I told you I was over you, or were you under me?
