

# Hey Katie

Josh Kelley

Hey Katie  
You really look great tonight  
I think about you all the time  
Your color up my life  
Just maybe  
(Maybe)  
You'll let me take you home tonight  
I've gotta have you by my side  
To wake up with the sunrise  
It's hard to drive when you're  
Putting on your makeup  
Can't stay in the lines  
Shaping up my heart  
For all the love I'll be giving to you  
I knew it from the start  
The starring role for my movie was you  
I knew it was you  
I'm playing it tough  
So you can't change your mind  
Hey Katie  
About 6 o'clock tonight  
I'll be waiting by the curbside  
Practicing my lines  
Just maybe  
(Maybe)  
You could help me hit my mark  
And I could try to play the part  
  
Memorizing lines  
You could build me a pharaoh  
I can be Billy Joe  
Shaping up my heart  
For all the love I'll be giving to you  
I knew it from the start  
The starring role for my movie was you  
I knew it was you  
I'm playing it tough  
So you can't change your mind  
Woohah

Making love  
In the middle of the day time  
Sun shines hot on my back  
Shaping up my heart for  
All the love I'll be giving to you  
I knew it from the start  
The starring role for my movie was you  
I knew it was you  
It's gonna take a lot to stop my heart  
Keep pumping for two  
Oh, I knew it from the start  
The starring role for my movie was you  
And I'm playing it tough  
So you can't change your mind
