Tourist (Stand In One Place)

Shane Nicholson

Could be everywhere you've been
Falling somewhere in between
The lines from place to placeCould be everything you see
In this tragic comedy
Of smiles without a faceI've walked every inch of your town
I've loved every sight, every sound
While you stand in one place
And just watch as the world goes aroundFirst you're here and then you're gone
Hey, whatever turns you on
Whatever makes you smileIt's World War III down on the street
The pills don't quite get you to sleep
But you're doing it in styleWhile everyone is left facing the sun
And they're all waiting
For the thing to explodeAnd I've walked every inch of their town
I've loved every sight, every sound
While they stand in one place
And just watch as the world goes aroundWe all can stand in one place
And just watch as the world goes around
