

There's a Light

Rory Gallagher

There's a light that shines on me
Ever since you came to me
It won't go, it won't go away
Now I know that you're gonna stay Now that I know your love
Means so much more to me now Come here now baby
Now look what you've done to me now
I don't pray for what could have been
I feel I'm flying naturally I can fly but I won't go away
In your sky that's where I wanna stay Come here now baby
Now look what you've done to me now
If I don't show, would you know
Where to look for me now? I do not stare absently
Counting waves up on the sea
Now I know where I wanna stay
There ain't no hard decisions to make Come here now baby
Now look what you've done to me now
If I don't show, would you know
Who to send for me now? There's a light
There's a light
There's a light
