

Recover - Curxes' 1996 Remix

CHVRCHES

Caught eye, call, hiding for you,
The skin so old.
I'll come clean
Everyone-everyone knows it's me.

And if I recover, will you be my comfort?
Or it can be over, or we can just leave it here,
So you can remember, choose any colour,
I've got the answer, open it and follow

I'll give you one, one chance
Say you can change our heart
Where can you take what you need
And you don't need me.
I'll give you one one chance
Say you can change our own
Where you can take what you need
And you know you don't need me.

Glow by blow, honest in every way I know
You appear to face the decision I know you fear

And if I recover, will you be my comfort?
Or it can be over, or we can just leave it here,
So you can remember, choose any colour,
I've got the answer, open it and follow

I'll give you one, one chance
Say you can change our heart
Where can you take what you need
And you don't need me.
I'll give you one one chance
Say you can change our own
Where you can take what you need
And you know you don't need me.
But you know you don't need me,

And if I recover, will you be my comfort?
Or it can be over, or we can just leave it here,
So you can remember, choose any colour,

I've got the answer, open it and follow

I'll give you one, one chance
Say you can change our heart
Where can you take what you need
And you don't need me.

I'll give you one one chance
Say you can change our own
Where you can take what you need
And you know you don't need me.
