

The Breeze

Wheeljack

Are you moving much too fast?
And the good times that just don't last
If you're always on the go
Make an angel in the snow and freeze Do you feel like you're stuck in time?
Forever waiting on that line
If nothing ever moves
Put that needle to the groove and sing Is it a dream keeping you awake?
Is it the stillness that makes you shake?
If you need to know for sure
What's on the ocean's floor just sink Do you like things the way they seem?
Or are you looking behind the scenes?
Well, if you gotta know
What it takes to make it so just believe Are there dark parts to your mind?
Hidden secrets left behind?
Where no one ever goes
When everybody knows it's alright Do you get dizzy on the ground?
There must be something going 'round
What blows us here today
It'll blow us all away The breeze will blow us all away
The breeze will blow us all away
The breeze
