

Alphaville

Bryan Ferry

Nobody knows you're here
Deep undercover
You seem a bit afraid
Why do you suffer? Another night
A night in Alphaville This time is made for love
Let's play together
In every bar and club
Now and forever Another night
A night in Alphaville You say you won't
But girl, I know you will
[Incomprehensible]
[Incomprehensible] I'm hungry for your love
You scream and whisper
A thousand alibis
You point the finger Another night
A night in Alphaville Don't try to read my mind
A broken circuit
And all my hands are tied
Nobody's perfect Another night
A night in Alphaville You say you won't
But girl, I know you will
The world goes 'round
But here it stays the same
In second class
Nobody knows your name Another night
A night in Alphaville You say you won't
But girl, I know you will
I wanna live
But life ain't worth a dime
Lasting and light
Reflected in your eyes Another night
A night in Alphaville
