

The Circle Is Small

Gordon Lightfoot

It's alright for some, but not alright for me
When the one that I'm lovin' slips around
You think it's fine to do things I cannot see
And you're doin' it to me, baby can't you see that I know how it is[Chorus:]
I can see it in your eyes and feel it in the way you kiss my lips
I can hear it in your voice whenever we are talking like this
I can see what you believe in when his name is mentioned and I die
I can watch the way you walk, the way you talk, the way you close your eyes
It's alright for some, but not alright
to be
Where the one that I'm lovin' can't be found
The city where we live might be quite large
But the circle is small, why not tell us all and then all of us will know[Chorus]It's alright to leave, but not
alright to lie
When you come home and you can't say where you've been
You think it's fine to do things I cannot see
And you're doin' it to me, baby can't you see that I know how it is[Chorus]
