

Straight To Your Heart

Bad English

I can't reach behind your eyes
You always look away
You hide behind your alibis
And change your mind
From day to day
If there's something I can do
Then I'll be there
Outside your broken world
You'll see, it's me who cares
Take me straight to your heart
'Cause this time's real and real lasts forever
I know, where you are
'Cause you know, I've been there before
Straight to your heart
I watch you move
And I watch you dance
I watch you drift away
And I'd give anything for you
And you know that's bad
When it gets that way
You can't go on like this
And I don't wanna fight again
I don't give a damn anymore
Right or wrong you're gonna let me in
Straight to your heart
'Cause this time's real and this time's forever
I know where you are
'Cause baby, I've been there before
Straight to your heart, this time, this time
Baby, I know where you are
'Cause you know, I've been there before
Then maybe I'll break down the walls
And my love will go straight to your heart
Inside, take me inside
Yeah, straight to your heart
'Cause this time's real and real lasts forever
I know where you are
'Cause this time we're goin' all the way
Straight to your heart, this time, this time

Baby, it's straight, yeah, yeah, yeah, yeah
This time it's straight to your heart
Oh yeah, 'cause this time it's real
