Unknown Entity

Sonic Syndicate

What does it take to stand a lie?
Once lost, now be embraced
Despair, love is for no one
Despair, time is on my side nowAnd when you dream of a new light
You came across the original me
You could tell me who he really was
But now it's all lost to you, new timeThe way you live, the way you learn, new life
The more you speak, the less we believe
Once more you learned a lesson
You're involved in trouble and drawn back
Whoever's missing, involved, unknown entitySentenced to carry the weakest
Just had them under my wings
Declare, intercept my mind
Declare, hope won't save you nowEven if it never matter
You met the copy cat of me
Who corner the original
Now can you save me from myself?Did we make it?
Are we there?
High and make me numb
This is not a love affair
