

I Want My Medicine

Hollerado

I found you all alone
I listened loud to that I know
You gave my head a home
Now I am out there running out I remember I was just knowing
I really am, it made me invincible
And where heads are turning
You can't always get what you what you say And til the clock pedals for fun
I love you, I come in red
But now I am breathing through tubes
And it's not how I speak of it
I have you all alone
You gave my heart a home
You make the days less long
Oh let me hear just one more song But still that's when you kill me for blindness
I swear you're my everything
I'm am setting to my hands on the pictures
I swear I am young again And the hospital pills I am burning
They're more like telepathy
And settling you now makes me feel like was never even born at all I need my medicine
I need my medicine
You've been up through the years
We've shed so many tears
I'm getting ready to die
I'm saying goodbye
To my record collection
