

When We Kiss

Bardeux

It was late one night and we had a fight
And it seemed like nothing was going right
Then you turned around and you walked right out the door
Now it's not the first time, it's not the last
I know all about your checkered past
And we've played this game one thousand times before
(Chorus)

Do you remember the night I can see it so clear
All the sweet little things that you sang in my ear
There were promises made but I think you forgot what you said
There's a real fine line between love and hate
And I'm not the type to just sit and wait
I've made up my mind I can't wait for you anymore•
But when we kiss, it feels like this
And when we touch, it means so much

So many days go by and I still want you so
If it was up to me I'd never let you go
You're the only true love in my life and I want you to know
All this passion and pain I think I'm goin' insane
We've got nothing to lose and so much to gain
If you love me today, who's to say
You might leave me again
(Chorus)
