

Stay the Course

Epica

Stay the course
Unregarded what the others think
Follow through your goals
Stay the course
Be impassive what all the others want
Go your own way Stand focused, stay strong Stay the course
And regardless what the critics say
Seek your golden road
Stay the course
Be hard and fast
Reach out, achieve your goals
Chase your own dreams Stay faithful, prolong Veils that cover the sacred treasures
That no one dares imbibe
Those procaining different views
Were long ago proscribed
I should warn you, it's deadly to abide
Instead I taught you to bow and toe the line Fear is what you breathe
Disagree
Guidance what you need
For all the chances you will never see
Trust in me Notice the anomalies
Erase them from your memory Fight dismay
Deny disarray
Just keep them far away from you and fight
With all your might Stay the course
Show no remorse
Terminate all that deters Veils that cover the sacred treasures
That no one dares imbibe
Those procaining different views
Were long ago proscribed
I should warn you, it's deadly to abide
Instead I taught you to bow and toe the line
I should warn you to never compromise
Instead I want you believing the disguise
