

# Sleepers (Demo)

## Saosin

What happened to us all?  
Have we slept through it?  
Taking hits off the surface It's too hard to swallow  
When their judgments are concentrated  
On everything they know Was it all enough?  
(No fair)  
Or did it wake you up  
From your sleeping? I've overheard it once  
This has gone on before  
It's too one and the same  
When you're accounted for We seem so far away from  
These things we used to know  
We seem so far away from  
Everything we are Everyone that moves around me  
They're saying nothing  
That makes the fight a blur Say we're something  
That no one wanted to hear  
They know that everything is wrong Was it all enough?  
(No fair)  
Or did it wake you up  
From your sleeping? I've overheard it once  
This has gone on before  
It's too one and the same  
When you're accounted for We seem so far away from  
These things we used to know  
We seem so far away from  
Everything we are All we are is golden  
This won't mean a thing  
All we are is golden  
This won't mean a thing
