Monster

Kris Allen

Just when you had me down
I go changing my ways
And I wait till the moon is out
It's just part of my game, yeah
This is a cautionary cry to you
Before you figure out what I'm gonna turn into
Just close your eyes and try to think it over
You realize I'm not the man you know, girl
I hypnotize ya
I paralyze ya
Go on and scream 'cause nobody's gonna find ya
(Chorus)
Did I ever think to tell you that I am a monster?
You have never seen this side of me (you've never seen it, you've never seen it)
Maybe I should wear a warning that says that there's danger
If you ever get too close to me
I've been telling you to run away
But you just say you're not scared
But when I break your heart some day
Girl you need to be prepared
So listen close I got a dirty little secret
The kind that takes away the air you try to breathe in

You won't believe it
Until you feel it
If love is blind I guess that's why you didn't see it.
(chorus)
Did I ever think to tell you that I am a monster?
You have never seen this side of me (you've never seen it, you've never seen it)
Maybe I should wear a warning that says that there's danger
If you ever get too close to me
Well you don't know what I know
no you don't know what I know
That you're not safe enough
Woo hoo
Woo hoo
Did I ever think to tell you that I am a monster?
You have never seen this side of me (you've never seen it, you've never seen it)
Maybe I should wear a warning that says that there's danger

If you ever get too close to me
Did I ever think to tell you that I am a monster?
You have never seen this side of me
Maybe I should wear a warning that says that there's danger
If you ever get too close to me
Did I ever think to tell you that I am a monster?
