

# Hellrider (Album Version)

## Judas Priest

Here they come  
These gods of steel  
Megatron  
Devouring what's concealed  
Speed of Death  
Crossfired they stare  
Final breath  
From vaporizing glares Raised to man oppressed  
Sign of persecution Hellrider  
Roars through the night  
Hellrider  
Raised for the fight All incensed  
To overthrow  
Strong defense  
With armaments they grow  
By this quest  
Their fate's renowned  
Put to rest  
Abominations crown Time to ram it down  
Judgment for the tyrant Hellrider  
Roars through the night  
Hellrider  
Raised for the fight  
Fight undying and eternal  
Wheels bring death and pain infernal  
Honor bound your strength repleted  
To no end they're undefeated Hellrider, Hellrider  
You fought their battle for them  
Hellrider, Hellrider  
You brought them through their despair  
Hellrider, Hellrider  
Your tempered steel relinquished  
Hellrider, Hellrider  
You slaught them all extinguished Wrath of doom  
In killing fields  
They consume  
Their valiants never yield Triumph to the gods  
Vanquished of enslavers Hellrider  
Breaking their will

Hellrider  
In for the killHellrider, Hellrider  
You fought their battle for them  
Hellrider, Hellrider  
You brought them through it all  
Hellrider
