

# Winter sleep

## OLIVIA inspi' REIRA (TRAPNEST)

It keeps coming back to me  
I remember this pain  
It spreads across my eyes  
Everything is dull Everyone's smiling, they're smiling  
It pushes me far far away  
I can't understand  
Everything is blue Can you hear me out there?  
Will you hold me now? Hold me now? My frozen heart  
I'm gazing from the distance and  
I feel everything pass through me  
I can't be alone right now  
Will you hold me now? Hold me now? My frozen heart  
I'm lost in a deep winter sleep  
I can't seem to find my way out alone  
Can you wake me I know when I let it in  
It hides love from this moment  
So I guard it close  
I watch the moves it makes But it gets me, But it gets me  
I wish I could understand how I  
Could make it disappear, make it disappear Anyone out there hear me now?  
Will you hold me now? Hold me now? My winter heart  
Kiss my lips and maybe you can take me to your world for now  
I can't be alone right now  
Will you hold me now? Hold me now? My winter heart  
Please make it all go away  
Am I ever gonna feel myself again?  
I hope I will
