

Turn It Into Something Good

Earth, Wind & Fire

Why, do you hang your head
And never, never satisfy the loneliness you tread
Spending your life, in the falling rain
Trying hard to drown the memories that's
Driving you insane You can't hid forever just decide to make it better
Turn it into something good
Remember, you can choose, not to lose
Find your groove and be a winner
Wake up, take a step ahead
Wake up, to the rising sun
Wake up, life has just begun to shine In you eyes, the somber blues
Reflects a place, from deep inside of knowing,
Not what to do
I'll be your rock, when you're about to fall
Together, we'll move on ahead and walk,
Right through it all You can't hide forever, just decide to make it better
Turn it into something good
Remember, you can choose, not to loose
Find your groove and be a winner
You can't hide forever, just decide to make it better
Wake up, take a step ahead
Wake up, to the rising sun
Wake up, life has just begun to shine
