Girls

Nizlopi

They go for you with their love and fear

They go being and never disappear

If you rub yourself along now

You'll get down to their kind of emotionStraight to your heart

Sweet doll

Straight to your heartGotta love and forgive
Or you can't breathe
Gotta search and be with
Or you can't breatheI got something to give

Before I leave

I can never run backI'm smothered in, memories of you are too
What is given back, we can't unglue
All this sticks to me, some days sweet like honey
Some days tart like MarmiteSticks to your heart
Sweet doll

Straight to your heartGotta love and forgive
Or you can't breathe
Gotta search and be with
Or you can't breatheI got something to give
Before I leave

I can never run backThe croft, the croft

Old lofts and searching

The path, the path

Of always searchingAll from the heart

All from the need

All from the love

All from the greedThe croft, the croft

Old lofts and searching

Right from the

Right from the heartOld from the need

Old from the love

Old from the greedI tell you this old heart is covered in glue

I can never run back or forget you

I tell you this old heart is covered in glue

I could never run back or forget youGotta love and forgive

Or you can't breathe

Gotta search and be with

Or you can't breatheI got something to give

Before I leave

I can never run back
