The Lens

Thee Oh Sees

Even though it's grey today, I can feel you near me, dear
Even though life's a pain today, I will be with you, near me, dearAh, then we both arrive at the same time again
Ah, then we're both alive at the same time againYou look through the lens today, all is cracked and hazy here, there
Hand in hand we will survive, I will love you always, here, dearAh, then we're both alive at the same time again
Ah, then we both arrive at the same time again
