

Come to Stay

Oleander

If you're sad and mad but glad to be away and free
From all the pain you've known inside you feel you've grown
If you take your time with every leap of faith you'll find
It's easier to grow with every step you know, yeah
Come to stay or stay away
Come to stay or stay away
If you take too long pretending that there's nothing wrong
Don't waste my time 'cause I'll be fine
Either way you'll see that who we are and what will be
In the end it's time to show step up and let me know, yeah
Come to stay or stay away
Come to stay or stay away
I hope that you can see
Nobody loves you more than me
Come to stay or stay away
Away, away, away, yeah
While distance grows between us
Every step you take away you take a piece of me
If you say so long pretending that there's something wrong
It's all for naught 'cause I forgot
If in time you find the only leap of faith was mine
Is it easier to go or say we'll never know
Come to stay or stay away
Come to stay or stay away
I hope that you can see
Nobody loves you more than me
Come to stay or stay away
Away, away, away, yeah, yeah
Away, yeah, yeah
Away, yeah, yeah
Away
