

# Winter Melody

**Donna Summer**

Emptiness and just a memory  
Love is gone with nothing left for me  
All these wasted feelings and something I no longer have  
I never knew that love could hurt so bad Winter melody, winter melody, winter melody  
Play for me, just for me  
'Cause he's not coming home and I'm here alone  
On my own I can't bear to see the sun go down  
Casting stormy shadows all around  
Nothing seems to matter, I just get by from day to day  
I never thought that you would leave this way Winter melody, winter melody, winter melody  
Play for me, just for me  
'Cause he's not coming home and I'm here alone  
On my own Winter melody  
Play for me, just for me  
'Cause he's not coming home and I'm here alone  
On my own Loneliness, that's all that's left for me  
Happiness is chilled by winters breeze  
And I keep on remembering the day that you came along  
And since you left, well I just sing the song Winter melody, winter melody, winter melody  
Play for me, just for me  
'Cause he's not coming home and I'm here alone  
On my own
