

Love Is Your Color (feat. Jennifer Hudson)

Leona Lewis

Ooooo ooooo....(a buncha mush)

Just when you think it's over
You're hit with a brand new start
And you found out right there within you
That you never lost that spark.

Love is your color...

It makes you shine,

So show your color

It comes from inside.

Some say

But Love is your color,

It makes you shine

Sometimes it's hard to cope

But you'll always know

It's your color

It comes from inside

Everything else is black and white

Love is

Your color

Love is a force that we can't hold back like

Love is a friend

That will hold your hand

Always right there by your side.

Love is a color,

Oh it makes you shine

I know

(I know)

I know

Show your color

It comes from inside

Everything else is black and white.

Oh no no no no

Love is your color

Love is your color

It makes you shine

(It makes you shine)

I know...

I know...
I know...I know I know I know...
It comes from inside
Everything else is black and white.

Oooooooooh oooh
Love is your color
Oooooooooh oooh
Love is your color
(Love is your color)
Oooooooooh oooh
Love is your color
(Love is your color)

Love is your color...
Baby,
Love is your color,
Show your color,
Love is your color.
