## Northwind Wolves

Far above a star i see, a star that ever stares back at me.

From beyond the skies , From beyond the seas

Look upon our world... , like your disease...The Stars themselves will fall tonight  
make your wish , before you die...so shall our reign come to an end, from beyond this we shall not ascend  
A death that one can-not transcend, into darkness we descend...Come away with me on a winter's Night...

Beneath the Sea of Stars thereof...

The Mist that reveals the skies despite...

The stars that fall down from above...Come away with me on a winter's Night...

Beneath a Sea of Stars so Cold...

Everything you know shall die...

Below a Sea of stars... Behold...Watch The Stars Fall from the skies Tonight...Watch them fall... Come on...The  
Stars will fall... Watch them fall...
