

Wind It Up

Steriogram

Close the mockers world, planets in the same room
Sentimental girls, all of which had fame too
Already gone, oh but they cant leave you
Fight their clinging on, fight but they cant be you All this time theyre wasting my rhymes
Do you know what it is makes you say those things
Or why you have a problem with what we bring
Suddenly we believe in more than just luck
Its not meant to offend you, just for us
We know that you gotta feel important
But its a shame that your ignorance is all youre flaunting
Your insecuritys out when you say we got no shot
Met thousands like you and we know they wont stop What if I would wind it up, wind it up, what if I could?
(Do you know a damn thing about what you are saying)
(You think youre in control but your gigs about to fold) Your insecuritys out when you say we got no shot
Met thousands like you and we know they wont stop
We dont mind cause we know what were searching for
Its the time in our life weve been working for
We dont feel elite when were doing this
Anyone can do it if you just take a risk
Its not just us that youre talking down to
Ive heard you say the same to everyone around you What if I would wind it up, wind it up?
(Do you know a damn thing about what you are saying)
(You think youre in control but your gigs about to fold)
What if I could wind it up, wind it up, what if I should ?
(Do you know a damn thing about what you are saying)
(You think youre in control but your gigs about to fold) Now Ill tell you Mr. Know-It-All
What you can do with all your worldly knowledge
You can take your business
And opinions and your mushroom and shove it up your
All this time theyre wasting my rhymes What if I would wind it up, wind it up?
(Do you know a damn thing about what you are saying)
(You think youre in control but your gigs about to fold)
What if I could wind it up, wind it up?
(Do you know a damn thing about what you are saying)
(You think youre in control but your gigs about to fold) What if I should wind it up, wind it up?
(Do you know a damn thing about what you are saying)
(You think youre in control but your gigs about to fold)
What if I could wind it up, wind it up?
(Do you know a damn thing about what you are saying)

(You think youre in control but your gigs about to fold)

What if I could?

(Do you know a damn thing about what you are saying)

(You think youre in control but your gigs about to fold)
