## Danny Wheeler

Diver down into the ocean  
Take her away  
Tell my friends I'm doing fine now  
At least today I watch you breathing  
I see you rise and fall  
Sometimes it gets so dark  
You don't see the sun at all Sign your name if it makes it better  
It could be just like it was  
You know that crying won't help you now  
If it ever did at all I can see much further now  
Than I ever did before  
But I really do appreciate your time So kiss me like the ocean breeze  
Kiss me like you still remember  
Come on, kiss me like the ocean breeze  
Kiss me like you still remember me I need to know my friend  
Does it hurt, are you in pain?  
Do it, clean my friend, take your time  
Peace will come again  
Would you believe me that I just have to  
Want to need, to want to break free? So kiss me like the ocean breeze  
Kiss me like you still remember  
Come on, kiss me like the ocean breeze  
Kiss me like you still remember me Kiss me like you still remember  
Kiss me like you still remember me Kiss me like the ocean breeze  
Kiss me like you still remember  
Kiss me like the ocean breeze  
Kiss me like you still remember
