Shudder

The Superjesus

(McLeod)I know what beauty can create and where you started from
we've been a vansihing of late and life is going on
why do we shudder in our sleepyour the enemy we're not afraid to know
another faculty dragging the scenes as you go
when you change, your graffiti of a different age
so lets go and paint something of the wall
it's what your waiting forcause i know what beauty can create and where you started from
we've been a vanishing of late and life is going on
why do we shudder in our sleepand what you say you feel dont really mean a thing
the common sense appeal, you couldn't bring to explain
if you can, but it's getting late and i've got plans
an that's life and you'll live a little more
it's what your waiting forcause i know what beauty can create...we're not afraid to know differently
