Dim The Lights

Ekolu

ooo yea, oh yea, oh yea
alright

said i really need you woman
oh I

you say your gonna leave me
cuz your sick and tired of me
you told me that its over
that youve turned a new page over
you drive me out my mind
and your leavin me behind
but before you walk through the door
there is something i need to make sure, baby

dim the lights, dim the lights down low
dim the lights, get it through your soul
dim the lights, dim the lights down low
dim the lights, get it through your soul

its you and me baby

before you go dim your lights down low

when you gone away and left me
dont dare come back and see me
cuz if i keep on seein you baby
its gonna make me feel so blue
when you need a little lovin
you just leave me behind
so before it happens again
we gotta live it like it is for the time being baby

dim the lights, dim the lights down low
dim the lights, get it through your soul
dim the lights, dim the lights down low
dim the lights, get it through your soul

tonights the night, to dim the lights

now when you gone away and left me
dont you dare come back and see me
cuz if i keep on seeing you baby
its gonna make me feel so blue
youve broke my heart before
and your leaving me behind
so before it happens again
we gotta live it like it is for the time being baby

dim the lights, dim the lights down low
dim the lights, get it through your soul
dim the lights, dim the lights down low
dim the lights, get it through your soul

dim the lights, dim the lights down low
dim the lights, get it through your soul
dim the lights, turn the lights down low
dim the lights, get it through your soul
