

New Found Power

Damageplan

Why have we waited so long?
Suppressing the power inside
Tear away all that was wrong
Something too massive to hide It's time to rip the chain from your neck
Let go the past as you purge
Free now from everything weighing you down
Open the floodgates and surge With new found power
New found power
New found power
New found power Cleansing yourself of the past
Learn from mistakes and move on
Conquering new ground at last
Unite and become twice as strong It's time to rip the chain from your neck
Let go the past as you purge
Free now from everything weighing you down
Open the floodgates and surge With new found power
New found power
New found power
New found power Nothing ventured, nothing gained
Hope was all that kept me sane
Rise above and prove myself
I'll survive without your help
Shut you out my strength comes from within New found power
New found power
New found power
New found power New found power
New found power
New found power
New found power Power
Power
