My Chemical Romance

Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide Make a wish when your childhood dies
Hear the knock, knock, knock when she cries
We're all alone tonight Hold your breath when a black bird flies
Count to seventeen and close your eyes
I'll keep you safe inside He burns my skin
Never mind about shape I'm in
I'll keep you safe tonight, yeah, yeah
Safe tonight Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide Blow a kiss up the methane skies
See the wasp through your playground eyes
We're all in love tonight Leave a dream where a fallout lies
Watch it grow where the tears stay dry
To keep you safe tonight He burns my skin
Never mind about the shape I'm in
I'll keep you safe tonight, yeah, yeah
Safe tonight Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide Love, love, love won't stop this bomb, bomb
Love won't stop this bomb, bomb
Love won't stop this bomb Run, run, bunny, run
Run, run, bunny, run Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide Move your body when the sunlight dies
Everybody hide your body from the scarecrow
Everybody hide
