

Under the Stars

Cantoma

You know you look so tired
You're gonna stay up late tonight
Under the stars

I'll put you in pride of place
I'm gonna set my sights
I'm gonna set your soul alight

Under the stars

Under the stars

So let the street lights shine away
Till the breaking of the day
In the morning you'll decay a little
We've led a lifetime come undone

Staring straight into the sun

Like the barrel of a gun

Under the stars

Under the stars

Been waiting my whole life
For you to come and waste a while
Out in the dark

In the emptiness of time and space

Been going out my mind

I gotta bring you back to life

You and your heart

You and your heavy heart

So let the street lights shine away
Till the breaking of the day
In the morning you'll decay a little
We've led a lifetime come undone

Staring straight into the sun

Like the barrel of a gun

Under the stars

Under the stars

You know you look so tired
You're gonna stay up late tonight

Under the stars

Under the stars

Under the stars

Under the stars

Under the stars
So let the street lights shine away
Till the breaking of the day
For tonight all of the saints are sinners
Yeah I can feel we're coming up
Like our heart starts filling up
Like it's rushing through our blood
Under the stars
Under the stars
Under the stars
