

I Only Get This Way With You

[Rick Trevino](#)

I only feel like I feel with you and nobody else
And I only want to be with you and be myself
But when I look in your eyes something happens to
Me everytime and I cant seem to find what to say to you I only get this way with you
I only get this way with you
I only feel this way with you
And when were together I feel like I never ever felt before
As if I'm walking thru that door to love a love like I never knew
I only get this way with you I want you to know how I feel when im holding you in my arms
And I want you to know how I miss you when were apart
But when I look in you eyes something happens to me everytime
And I cant seem to find what to say to you I only get this way with you
I only get this way with you
I only feel this way with you
And when were together I feel like I never ever felt before
As if I'm walking thru that door to love a love like I never knew
I only get this way with you Then I think about all the times I've known
What I thought was love it was never this strong I only feel this way with you
And when were together I feel like I never ever felt before
As if im walking thru that door to love a love like I never knew
I only get this way with you I only get this way with you
I only feel this way with you
