Float

The Neighbourhood

Imagine breathing in
Imagine leaving all your air behind
What matters in the end
A matter of opinion 'til you find outLife can only mean hardly anything
All I'll ever be is partly settled inTo show you how to swim, then they throw you in the deep end
I've been learning since, but it doesn't mean I'll float, oh no
I won't float, no, no, no, no, won't floatI had a funny sleep,
I didn't have a dream
'Cause I don't believe in themLife can only mean hardly anything
All I'll ever be is partly settled inTo show you how to swim, then they throw you in the deep end
Well I've been learning since, but it doesn't mean I'll float oh no no no
I won't float, no, no, no, no, ohFloat away, float away, then come right back to me
Float away, float away, then come right back to meTo show you how to swim, then they throw you in the deep end
Well I've been learning since, but it doesn't mean I'll float
To show you how to swim, then they throw you in the deep end
Well I've been learning since, but it doesn't mean I'll float no oh no
I won't floatWhat if I, what if I don't float?
What if I don't float?
I think I'll float, I'll float
I'll float away
