

When You Say My Name

Jessie James

Monday a long day
Startin' off the wrong way
Runnin' on empty
Faith and black coffee You left early
Gotta get the bills paid
I miss your face baby
I just can't wait 'Til we're all alone
And this mad world fades away When you say my name
Everything comes alive
Take the darkest room
And you turn on the lights
When you touch my hand
You're telling me a secret
Only we can understand When you say my name
Say my name, say my name
When you say my name
Say my name, say my name Hard times heartache
Got the strength that love makes
Somehow someway
Gonna find it someday No matter what life brings
I know it's gonna be okay When you say my name
Everything comes alive
Take the darkest room
And you turn on the lights
When you touch my hand
You're telling me a secret
Only we can understand When you say my name
Say my name, say my name
When you say my name
Say my name, say my name It's such a sweet kiss
My name on your lips, oh
I can't resist it
I can't resist it
No no no Mm yeah
When you say my name
Everything comes alive
Take the darkest room
And you turn on the lights
When you touch my hand

You're telling me a secret
Only we can understand
Only we can understand Say my name, say my name
When you say my name
Say my name, say my name
When you say my name
Say my name, say my name
Say my name, say my name
