

Dakota

Wrens

the Dakota is down and lost off the track
check the directions
you can finger us here and I 'm sure we 'd be there
sweat the directions
it always happens
into the gray skies
has the Twins been found with rats all around
getting sick in the basement
got me there and lost with sweat pouring down
sorry meet your replacement
I 'm only kidding Jerry
it always seems I 'm late I had to do some errands
I 'll be there in just a bit don 't wait up for me
they 're at it again just listen to them
running straight to mother
I got to get it done
we 're handing it in on the second (it will never happen)
