

# Stand Strong

## Cold Stare

We will stand strong  
You can rely on me  
Time will move on  
I'll never go away  
Right what is wrong  
Remember you don't have to pray for me today  
We will stand strong  
Through all the misery  
Time will move on  
I'll never watch you bleed  
Right what is wrong  
Remember you don't have to pray for me today  
Everything you want to be is guided by your misery  
you're broken, you're running out of time  
Now the worlds turned inside out  
A one way street so full of doubts  
You've fallen into your demise  
Scream and shout, turn it inside out  
We're always searching for the reasons why  
And now it's time for you to take what you believe in  
The time is now, i'm taking back what's mine  
There's no need to live your life without a reason  
You've got to live every moment till the day you die  
The time has come for you to see that life is filled with levity  
Your choice is to hold your head high

Emotions they are bleeding out a shinning light to guide you  
Now you're fighting, fighting for your life  
Scream and shout, turn it inside out  
We're always searching for the reasons why  
And now it's time for you to take what you believe in  
The time is now, i'm taking back what's mine  
There's no need to live your life without a reason  
You've got to live every moment till the day you die  
We will stand strong  
You can rely on me  
Time will move on  
I'll never go away  
Right what is wrong

Remember you don't have to pray for me today  
We will stand strong  
Through all the misery  
Time will move on  
I'll never watch you bleed  
Right what is wrong  
Remember you don't have to pray for me today  
And now it's time for you to take what you believe in  
It's all right there in front of your eyes  
There's no need to live your life without a reason  
You've got to live every moment till the day you die  
Till the day you die
