Land Beyond The Forest

Atrocity

I walk through the hills and march down the plains
So many years but I was always there
Deep in my heart I remember the time
Oh father, how could you endure this fate?I will stand for, I will fight for
I die for the land beyond the forestOh yes, I will complete what you have begun
I will face my destiny
Oh father, I won't fail my final missionThe greenest grass, the whitest snow
I breathe the air, I absorb the land
So cold the wind, so high the mountains
I will never forget this fascination, this closeness, this familiarity
This familiarity I will never forget
In life or beyond death
