

# Popularity

## Skyzoo

They got the raddest hooks, they got the dopest looks  
And when they're misunderstood it's even better  
And they all agree the future ends with me  
On their computer screens like they even  
Matter to the words we sing or feel apart in our melodies  
If all you have is yourself, you're never going to need anyone else  
Popularity, do you think it's scary?  
Everybody's talking with their own opinion  
Popularity, it's a lot to carry  
I'll fall asleep to you screaming in my brain  
My brain, my brain  
Float into a room, I feel the attitude  
When I'm all alone it's even better  
Try drops a line, we all fall right in time  
And when you sing along, that's when we know you  
Matter to the words we sing or feel apart in our melodies  
If all we have is ourselves, you're never going to need anyone else  
Popularity, do you think it's scary?  
Everybody's talking with their own opinion  
Popularity, it's a lot to carry  
I'll fall asleep to you screaming in my brain  
Popularity, do you think it's scary?  
Everybody's talking with their own opinion  
Popularity, it's a lot to carry  
I wake up to you screaming  
Popularity, I keep on keeping  
But everyone's dying for their own opinion  
Popularity, yeah, I think it's scary  
I'll fall asleep to you screaming at my brain  
My brain, my brain, my brain, my brain
