

# Connected

## The KGB's

No one else will help us to get through  
So by ourselves, we'll know just what to do  
We are connected, we'll never be alone  
We walk together forever down that road  
You and I will share all that we know  
So close your eyes and just let yourself go  
We are connected, we'll never be alone  
We walk together forever down that road  
We are connected, we'll never be alone  
We walk together forever down that road, road  
And if you fall behind and don't know what to do  
I promise I'll be waiting there for you, for you  
Follow me into a better day  
We'll be alright, no matter what they say  
We are connected, we'll never be alone  
We walk together forever down that road  
We are connected, we'll never be alone  
We walk together forever down that road  
Road, road, road
