Vagina Song

Longpigs

[spoken]
... song about biology
and how it fucks up with love every now and thenThe face you live in,
it doesnt necessarily have to be yours
pause for a minute
forget your excuses
and just like any other
youve got no short stories
it's cause for alarm
well ive no eyes in my headto see you there
more than vagina you said
and its lies lies lies in your head
i need you more
more than your vagina i saidmay i mention
may i suggest you expect to be happy
with flaws, imperfection (in perfection?)
what do i look like
you're closing your eyes to all ready-made babies
its yours for the taking
well i've no eyes in my headto see you there
more than vagina you said
and its lies lies lies in your head
i need you more
more than your vagina i saidlisten is the father the son
the hungry the ghost of all thoseThe face you live in
it doesnt necessarily have to be yours
pause for a minute
forget your excuses
and just like any other
youve got no short stories
it's cause for alarm
well ive no eyes in my headto see you there
more than vagina you said
and its lies lies lies in your head
i need you more
more than your vagina i said
