The Future Is So Bright

C-block

The future is so bright, everyday & everynight.
Every night & day, I can find my way.
To where I wanna go & what I wanna find.
What I wanna do, as I leave the past behind.
Baby, baby, I was out of reach.
Till you came & showed me what it means.
You told me that, the future's my believe.
It's up to me, whatever will be.
They are feelings that are worth fighting for.
They're the feelings deep inside.
I gotta go, gotta try, gotta leave my past behind.
'cause the future seems so bright.
The future is so bright, everyday & everynight.
Every night & day, I can find my way.
To where I wanna go & what I wanna find.
What I wanna do, as I leave the past behind.
Coming on & on, 'cause the stream into our future.
Making rhymemixs to resuit you.
And it's a scene that you play in your life.
Making people scream for more & they say the clock is hot.
Still, I'm moving on from the night before & watch you see change into the nightdraw.
Now can you help me? I take it day by day.
In a time & I felt it.

So can I find my own, anytime?
Relax my mind & then my own mind.
See I'm still moving on with my mics.
To let you know the future's still bright.
The future is so bright, everyday & everynight.
Every night & day, I can find my way.
To where I wanna go & what I wanna find.
What I wanna do, as I leave the past behind. (x2)
The future is,
so bright.
Stay strong, as we live to future. Relax the mind & take control.
See the future is still bright.
Let the future lead your way, all you gotta do is stay.
And be strong, be stronger.
'cause tomorrow's not today & there is a better day.

Be strong, uz the future is so bright.
The future is so bright, everyday & everynight.
Every night & day, I can find my way.
To where I wanna go & what I wanna find.
What I wanna do, as I leave the past behind. (x2)
