

Tonight

Moist

She goes down like rain
She goes down the hard way
Spilling herself on your body I wonder where you are tonight
Just outside the dark
She waits by the highway
Hoping to go but her mind just stays I wonder where you are tonight
Ease into you, ease into me
Fell from the places left to believe
All from the time
And time is what for Redress the weight
And bury the world
Time will save
You come what may She goes down like rain
She goes down the hard way
Trying to run but her mind just stays I wonder where you are tonight
