Down To Earth

Barenaked Ladies

Some people are just all show Well, I dont mind that if the show is worth watching

But its all bark and no tree

Whats more ironic than a hippie in Versace? Its all peace and love and limousines

You got the right message but the wrong intentions

How can you be touchy-feely when youve lost touch?

I think its time we had a little intervention with youHey now, wake up and lose the make-up

She makes you wanna know her

When you dont know what its worth

Now you really wanna show her

How shes just so down to earth via satelliteThere's no better friends than the, the kind you pay

If they don't bow and scrape then the door will keep revolving

Its a tight circle of the chosen few

Well, howd you manage that? With the recipe involvingJust a pinch of sweetness and a cup of angst

Mix it all up, you're the all purpose flour

Though it looks delicious, something smells bad

I dont think Id last a half an hour with youHey now, wake up and lose the make-up

She makes you wanna know her

When you dont know what its worth

Now you really wanna show her

How shes just so down to earth via satelliteWhats it like to love you

When theres no one else above you?

And no one gets to know you

Well, wholl be there to show you via satellite? Its like making love to a TV

Its kinda novel but its miles away from satisfying

Your hangers-on say its a great deal

But what youre selling, theres no chance in hell

That III be buying Hey now, wake up and lose the make-up

She makes you wanna know her

When you dont know what its worth

Now you really wanna show her

How shes just so down to earthShe makes you wanna know her

When you dont know what its worth

Now you really wanna show her

How shes just so down to earth via satellite
