Organs On The Kitchen Floor

The Jealous Girlfriends

Say, say you want to go, well, then don't hesitate
It's been so long since you've been clear on anything
Lovers and police pull you back every time
And you ran with your hand in your mouth and a smoking gunSo don't leave your organs on the kitchen floor
And don't forget to close the door
'Cause I am always here
There I am but where is heYou're living with mom again
You're waiting for will to kick in again
You're doing time at the food mart
With your eye on your purse
And your thumb in your heartAnd then there's that saying that if you love something
you have got to set it free
But if it comes back then you are just
You're as broke as can beSo don't leave your organs on the kitchen floor
And don't forget to close the door
'Cause I am always here
There I am but where is heIt's been a long time coming
