

# Wait

## Barbra Streisand

Wait before we take another breath  
We've lived another moment of our lives  
And now is fast becoming then Wait before you take your lips from mine  
How quickly where we are is where we've been  
And give is given Once before I knew that I'd be yours  
A moment didn't seem a thing at all  
Just like a penny at a fair Once I never dreamed there'd come a time  
When time would need another day  
Another week, another year with you  
Forever doesn't mean forever anymore Wait before we take another breath  
Before you take your lips away from mine  
And where we are is where we've been Ohh wait  
When you're in love the way we are  
When every kiss and every touch  
And every night is like a dream come true It's then you realize how small forever is  
As now I do  
That's why I treasure all the moments of my life  
With you
