

# Feel No Pain

## Neal Casal

Come and see me later on  
You know where I'll be  
In the shade out by the barn  
Where no one can see me  
Come and lay down in the sun  
Another blue sky  
And tell me that you'll be the one  
To make my dreams up and Fly away  
With no help from above  
I'll feel no pain Now all my friends were here today  
And they were all talking  
They had such good things to say  
Oh, yes they did  
I see you standing by the gate  
In silent spirit  
It makes me wish there was a way  
I could make your dreams up and Fly away  
With no help from above  
You'd feel no pain  
With only love to guide you on your way  
Every day  
And when it's over,  
You will feel no pain Now I see the world  
Through such tired eyes  
But I don't know why  
But maybe I can trace it to the time  
When their dream became my lie  
And now it's up to me to try  
Try to face up to the truth somewhere inside  
Oh, now I've got to try So come and see me later on  
You know where I'll be  
Singing these songs out by the barn  
Hoping they'll hear me  
So go and try to save your sons  
While you still have time  
And tell them they're the only ones  
Who can make their dreams up and Fly away  
With no help from above  
They'll feel no pain

With all of your love to guide them  
On their way  
Every day  
And when it's over  
They will feel no pain  
Feel no pain  
And when they're older  
They will feel no pain
