

Science Is Real

They Might Be Giants

Science is real
From the Big Bang to DNA
Science is real
From evolution to the Milky Way
I like the stories
About angels, unicorns and elves
Now I like the stories
As much as anybody else
But when I'm seeking knowledge
Either simple or abstract
The facts are with science
The facts are with science
Science is real
Science is real
Science is real
Science is real
From anatomy to geology
Science is real
From astrophysics to biology
A scientific theory
Isn't just a hunch or guess
It's more like a question
That's been put through a lot of tests
And when a theory emerges
Consistent with the facts
The proof is with science
The truth is with science
Science is real
Science is real
Science is real
Science is real
