

# Young Love (Acoustic)

[Nikki Yanofsky](#)

Young love  
Rebels in a world where no one trusts each other  
Young love  
All we got is us Say we're lost in each other's eyes  
Say we're gone, been hypnotized  
They say were young to be this bound Shut the world off for a while  
Make 'em think we're running wild  
They're talking loud, don't hear a sound Far from what those people say  
Won't let this go to waste  
We got that "once in a lifetime"  
We've got that  
Young love  
Rebels in a world where no one trusts each other  
Young love  
All we got is us  
That's more than enough  
Cuz your love  
Is greater than a thousand planets, undiscovered  
Young love  
Young love I fell for you just like a child  
But it's not just juvenile  
Why should I explain myself? Far from what those people say  
Won't let this go to waste  
We got that "once in a lifetime"  
We've got that  
Young love  
Rebels in a world where no one trusts each other  
Young love  
All we got is us  
That's more than enough  
Cuz your love Is greater than a thousand planets, undiscovered  
Young love  
Young love We built our hopes so high  
But they're gonna try to climb and break us  
They don't understand what we have found  
Won't let them in this place  
Won't listen when they say  
That we are way too young to ever feel this way We found  
Young love

Rebels in a world where no one trusts each other  
Young love  
All we got is us  
That's more than enough  
Cuz your love  
Is greater than a thousand planets, undiscovered  
Young love  
Young loveYoung love  
Rebels in a world where no one trusts each other  
Young love  
All we got is us  
That's more than enough  
Cuz your love Is greater than a thousand planets, undiscovered  
Young love  
Young love
